

# PRINTS STUDIO – FULL STACK

## BLAZOR WEB APPLICATION

### Overview

**Prints Studio** is a modern, full-stack web application designed to allow users to customize, design, and order printed materials like business cards, wedding invitations, and personalized products. It features a rich UI/UX using **Blazor WebAssembly** on the client-side and a robust backend built with **ASP.NET Core**, **Entity Framework Core**, and **Clean Architecture** principles. The application includes user roles, login/signup systems, a dynamic gallery, template customization, product management, and admin tools.

---

### Technologies Used

#### Client-Side (Frontend)

- **Blazor WebAssembly**
- **Blazor Components** (with `@code`, `@parameter`, `@inject`)
- **Bootstrap 5** (for responsive design)
- **HTML5 & CSS3**
- **JavaScript Interop** (for alerts, modals, confirmations)
- **LocalStorage API** (to store login/session state)
- **NavigationManager** (for routing/navigation)
- **Blazor Forms** (two-way binding, validation, submission)
- **Dynamic Components and Conditional Rendering**
- **Breadcrumb Navigation** (for user path tracking)

## Server-Side (Backend)

- **ASP.NET Core**
- **Entity Framework Core (Code First)**
- **RESTful APIs** using Controllers and DTOs
- **ASP.NET Core Identity** (role-based authentication)
- **Clean Architecture** layered approach
  - **Domain** – Entities, Interfaces
  - **Application** – Services, DTOs, Interfaces
  - **Infrastructure** – Data access (Repositories, DBContext)
  - **Server** – API Endpoints, DI Configuration
- **Dependency Injection** for all services/repositories
- **AutoMapper** (for mapping DTOs <=> Entities)

---

## Core Entities (**Entities** Folder)

File	Description
Booking.cs	Handles booking appointments or order requests
ContactForm.cs	Manages user-submitted contact messages
CustomizationOption.cs	Defines available product customizations (e.g. paper type, size, color)
Designer.cs	Represents users with the <b>Designer</b> role
LoginModel.cs	DTO for login operations
Order.cs	Represents customer orders
OrderItem.cs	Line items inside an <b>Order</b>

Product.cs	Main product data (e.g. wedding cards, business cards)
ProductDesignTemplate.cs	Templates with predefined styles for users to select and customize
RegisterModel.cs	DTO for user registration
Review.cs	User-submitted reviews for products

## Functional Highlights

### User Roles

- **Admin** – Full access to product management, user handling, customization, templates.
- **Designer** – Can upload/edit templates, view orders, manage own products.
- **Customer** – Can register, log in, customize templates, place orders, and leave reviews.

### Authentication & Authorization

- ASP.NET Core Identity for user management
- LocalStorage used to store logged-in user info on the client
- Role-based authorization: Admin/Designer/Customer access logic on both frontend and backend

### Product Management

- Admins can:
  - Add new products with dynamic forms
  - Attach customization options (size, color, font)
  - Manage categories and stock status
- Product images and templates can be uploaded

## Gallery System

- **Product Design Template Gallery**
  - Showcases pre-designed cards/products
  - Users can select a template and customize before ordering
  - Templates have live previews using image rendering

## Customization Options

- Size selection (e.g. A5, A6)
- Font family and color
- Paper type
- Quantity
- Special instructions field

## Ordering & Booking

- Seamless order placement flow with:
  - Cart management
  - Order summary
  - Checkout form with delivery details

## Contact & Reviews

- **ContactForm** component allows user feedback/messages
  - **Review** system for user feedback on products
-

# Navigation & UI Features

## Breadcrumb Navigation

- Displays the current path: e.g. Home > Products > Business Cards > Customize

## Form Handling

- Strong use of Blazor Forms:
  - Validation via DataAnnotations
  - Dynamic inputs (e.g. customization dropdowns)
  - Input binding (`bind-Value`)

## Routing & Page Navigation

- `@page` directive used for routing
- Parameter passing via `@parameter` and `QueryString`
- Redirection via `NavigationManager.NavigateTo(...)`

## UI/UX

- Fully responsive using Bootstrap
  - Cards, Modals, Buttons, Tabs styled consistently
  - Custom CSS and themes applied
  - Toasts & Alerts via JS Interop
-

## Admin Panel Features

Feature	Description
Manage Products	CRUD operations for all product types
Upload Templates	Upload and preview new product design templates
View Orders	Track orders placed by users with filtering by status
User Management	View, promote, deactivate users
Customize Options	Add/update customization options (color, paper, size)
Contact Messages	View submitted queries via <code>ContactForm.cs</code>

## Component Interactions

### Blazor Parameters

- `[Parameter]` used in:
  - Template gallery (receiving selected template)
  - Product card (show productId and route accordingly)
  - Admin edit panel

### LocalStorage Integration

- Stores:
  - Logged-in user info
  - JWT or session data
  - Saved cart items (optional)

## REST API Integration

- HTTP calls via `HttpClient` to backend endpoints
  - APIs return DTOs for:
    - Products
    - Orders
    - Users
    - Templates
    - Reviews
  - CRUD operations handled through centralized services
- 

## Conclusion

**Prints Studio** is a real-world, production-ready web application combining the best of modern C# and web development paradigms. With a clean separation of concerns, role-based identity, dynamic product customization, and interactive UI, it stands as an ideal example of a full-stack enterprise-grade solution using **Blazor WebAssembly** and **.NET Core**.

---

# User Flow/ Application Flow

The **Prints Studio** application offers a seamless experience tailored to both **customers** and **designers**. Here's a step-by-step breakdown of how different users interact with the system:

---

## 1. Visitor (Unauthenticated User)

- Lands on the **Homepage** featuring:
  - Login & Signup buttons
  - Product categories and templates (only for **preview**)
  - Designer showcase and available services
- Can **browse** products and templates freely
- Cannot:
  - Add to cart
  - Checkout
  - Hire designers
  - Download templates

---

## 2. Registration / Login

- Users can **create an account**:
  - As a **Customer** (default)
  - Or later register as a **Designer**
- Upon successful **login**, session info is saved in **LocalStorage**
- Role-based logic is applied:

- Customers are redirected to product catalog
  - Designers are redirected to the designer dashboard
- 

### 3. Customer Functionalities

After login, the user can:

- **Download templates** from the gallery
- **Add products** to cart (with customization options)
- **Hire a designer** for personalized design work
- **Place orders / Checkout**
- **Leave reviews** for completed orders
- **Send messages** via the contact form

 Note: Checkout requires filling in delivery details and confirming customization options.

---

### 4. Register as Designer

- Any authenticated user can **apply to become a Designer**
- Once approved (or auto-approved, based on business logic), the user gains:
  - Access to **Designer Dashboard**
  - Ability to **upload templates**
  - Ability to **accept bookings**
  - Ability to **view assigned projects or orders**

- Manage their own **profile and service rates**
- 

## 5. Designer Functionalities

Once registered as a designer, the user can:

- **Upload and manage design templates**
  - **Accept or reject bookings** from customers
  - **Collaborate on custom orders** (e.g., wedding cards, business cards)
  - **Mark work as completed**
  - **Get reviewed by customers**
- 

## 6. Order Fulfillment & Feedback

- Admins and Designers can **track the progress** of each order
  - Customers receive **notifications or status updates**
  - After delivery, the customer can:
    - Leave a  review
    - Book the same designer again
- 

## 7. Session Management

- Login sessions are stored in **LocalStorage**
- Auto-logout or manual logout clears the local data
- Pages are dynamically shown/hidden based on authentication status and user role

## App Screenshots:

### ❖ Section 1: Landing Page Overview

🏠 The landing page welcomes users with a **visually appealing hero section**, showcasing trending designs, promotions, and key categories like *Customize*, *Catalogue*, and *Templates*.

🎯 Quick-access buttons ensure smooth navigation, while the responsive layout offers a seamless experience across all devices. This section is designed to **instantly capture user interest** and guide them into the app's core features.

The screenshot shows the landing page of the Prints Studio app. At the top, there is a navigation bar with links for "Prints Studio", "About", "Our Product", "FAQs", "Contact", "Login", and "Sign Up". Below the navigation bar, the main content area features a teal background with white circular decorative shapes. On the left, there is a large, bold heading: "We provide DIGITAL PRINTING services". Below this heading, a subtext states: "Business cards, Flyers, brochures, stationeries etc., and also in house graphic design." To the right of the text, there is a 3D-style illustration of a printing studio. The illustration depicts several people working with large industrial printers and paper rolls. The overall design is clean and professional, emphasizing the company's focus on digital printing services.

## ⌚ Section 2: Product Cards with Direct Links

This section displays clickable product cards (e.g., business cards, wedding cards) that fetch data dynamically from the backend. Each card includes an image, title, and brief info, and redirects the user to the **Product Detail Page** on click.

Business Cards

Flyers

Custom Stickers

Photo Books

## ❖ Section 4: Discounts & Trending Templates

💡 This section showcases **exciting discounts** and a curated list of **⭐ trending templates** to grab user attention. From festive deals to popular design picks, users can quickly explore **🔥 hot-selling templates** and enjoy limited-time offers, making customization both **affordable** and **fashion-forward**.

### Trending Now

## 🗣 Section 5: Customer Feedback & Reviews

🌟 This section presents **real user testimonials** and feedback on our professional services. It helps build **trust**, highlight **🌈 user satisfaction**, and offer insights into the quality of our customized products. Displaying ratings and reviews encourages new visitors to feel confident while placing their first order. 🗣️ 💫

“

Hear what they have to say about our professional services.

The testimonial section features four cards, each containing a profile picture, the name, title, a short quote, and a five-star rating icon. The cards are part of a horizontal scrollable slider indicated by left and right arrows.

Customer	Title	Rating	Testimonial
Halley Frank	Marketing Specialist	★★★★★	“Lorem ipsum dolor sit amet, consectetur adipisicing elit.”
John Doe	Web Developer	★★★★★	“Consectetur adipisicing elit.”
Lisa Trey	Public Relations	★★★★★	“Voluptatem accusantium doloremque.”
James Ford	Graphic Designer	★★★★★	“Eaque ipsa quae ab illo inventore.”

## Section 6: Fat Footer – Your Quick Access Hub

📌 The **Fat Footer** acts as a compact navigation and support center. It includes:

-  **Quick Links Menu** for easy access to key pages
-  **Our Services** to highlight offerings
-  **Connect With Us** via social media platforms
-  **Contact Information** to reach out for support or queries

This section ensures users have everything they need at their fingertips – even at the bottom of the page!

## ⌚ Section 7: Sign In Page – Secure User Access

💻 The **Sign In Page** provides a **secure gateway** for registered users to log in using their **email and password**.

🌟 It features:

- Clean and minimal design for ease of use
- 🔒 Password masking & validation feedback
- 📁 Session persistence using Local Storage
- 🔑 Redirects users to their respective dashboards based on role (Admin, Designer, Customer)

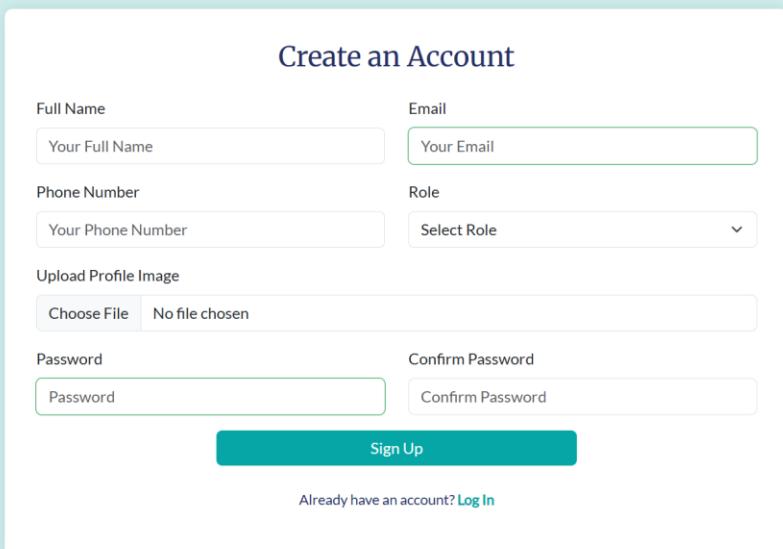

## Section 8: Sign Up Page – New User Registration

 The **Sign Up Page** enables new users to create an account by entering their name, email, password, and selecting their role.

### Highlights:

- Role selection: Admin / Designer / Customer
- Form validation using Blazor forms and DataAnnotations
- Smooth navigation after successful registration

The screenshot shows a "Create an Account" form on a light blue background. The form fields include:

- Full Name: A text input field with placeholder "Your Full Name".
- Email: A text input field with placeholder "Your Email".
- Phone Number: A text input field with placeholder "Your Phone Number".
- Role: A dropdown menu labeled "Select Role".
- Upload Profile Image: A file upload input field with placeholder "Choose File" and "No file chosen".
- Password: A text input field with placeholder "Password".
- Confirm Password: A text input field with placeholder "Confirm Password".

A teal "Sign Up" button is at the bottom, and a link "Already have an account? Log In" is at the bottom right.

## Section 9: About Us Page – Know Us Better

 The **About Us** page shares the vision, values, and team behind **Prints Studio**. It highlights our mission to deliver seamless and creative custom printing solutions using modern technology.

 **Trusted By:** Thousands of users and creative businesses across Pakistan rely on our platform for quality and consistency.

 **Meet the Team:** A dedicated mix of designers, developers, and support staff work together to ensure a smooth user experience and beautiful product delivery.

 **Achievements:** Featured in local exhibitions, 95%+ positive feedback, and a growing user base in over 20+ cities.

 **Why Choose Us?** Modern UI, personalized templates, responsive design, role-based dashboards, and end-to-end order tracking — all built using secure Blazor & .NET Core architecture.

## We provide solutions for your business!

## 📞 Section 10: Contact Us Page

👤 Users can send inquiries, feedback, or business proposals through a **Contact Form**. All submissions are stored in the database and visible to admins.

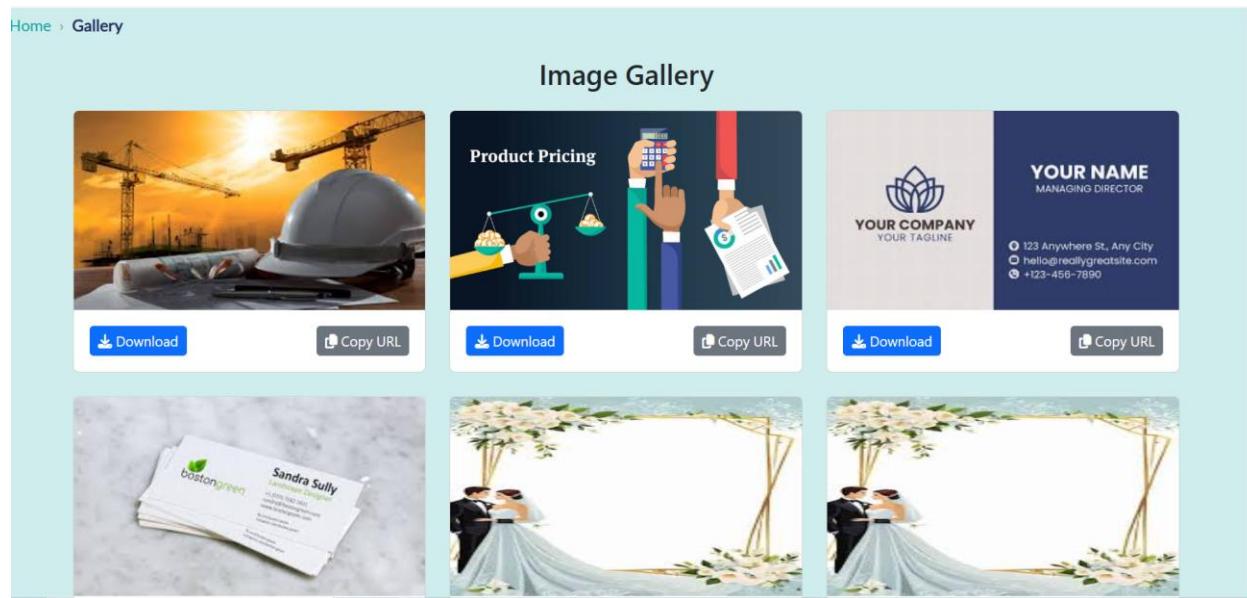

## ❓ Section 11: FAQs Page

❓ The **FAQs page** answers common user questions, enhancing usability and reducing support queries.

What printing services do you offer?	How do I upload my design?	Can I make changes after placing an order?
We offer business cards, flyers, brochures, banners, posters, booklets, and more—both digital and offset printing options available.	You can upload your files directly on our website while placing your order. We support PDF, JPG, PNG, and AI formats.	If your order hasn't gone to print, you can still make edits. Contact our support team ASAP for adjustments.
What is the turnaround time?	Do you offer delivery?	What are your payment options?
Standard orders are completed within 3–5 business days. Express service is available for next-day delivery on select products.	Yes, we deliver across Pakistan. Delivery charges and time depend on your location and order size.	We accept payments via credit/debit cards, bank transfers, Easypaisa, and JazzCash.
Do you offer design templates?	What if I'm not satisfied with the	How can I contact customer support?

## Section 12: Image Gallery

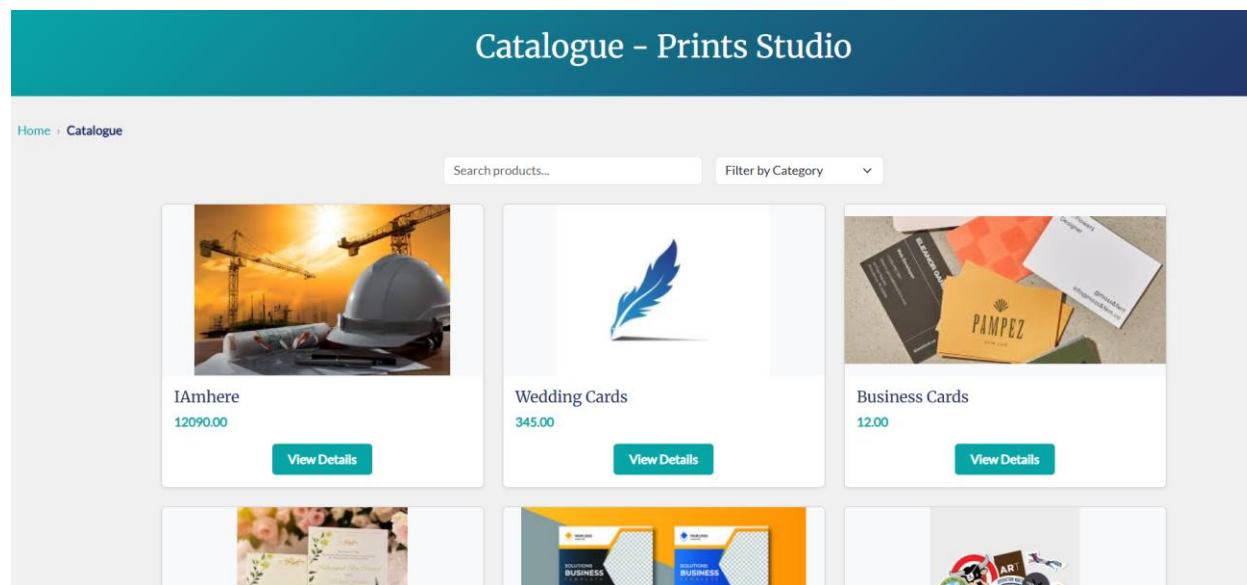

- Showcases a collection of **design templates**, sample cards, and previously fulfilled orders to inspire users.

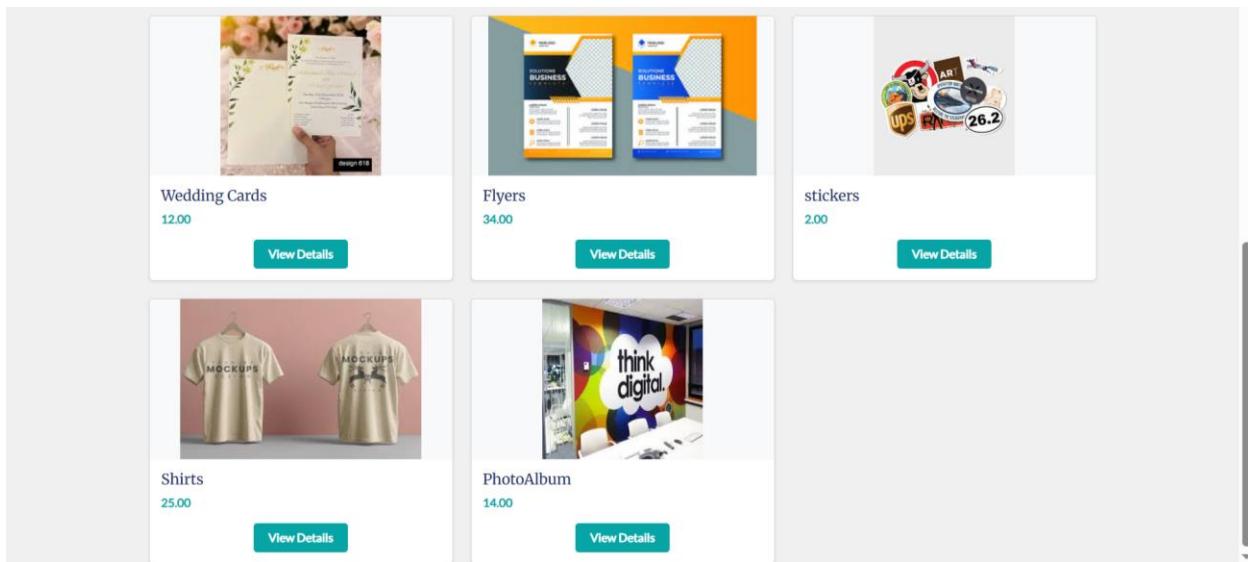

The screenshot shows a "Image Gallery" page with a light blue header and footer. The main content area displays four rows of items. Row 1: A construction-themed image with a hard hat and blueprint, labeled "IAmhere" and "12090.00", with "Download" and "Copy URL" buttons. Row 2: An illustration of hands holding a calculator and a scale, labeled "Product Pricing", with "Download" and "Copy URL" buttons. Row 3: A logo template featuring a stylized flower and the text "YOUR COMPANY YOUR TAGLINE", with "Download" and "Copy URL" buttons. Row 4: Two images of a couple at a wedding ceremony under a floral arch, labeled "Business Cards" and "12.00", with "Download" and "Copy URL" buttons.

## Section 13: Catalogue Page – Product Listings

- Both pages of the **Catalogue** display categorized product listings such as wedding cards, business cards, etc., with filters and customization buttons.

The screenshot shows a "Catalogue - Prints Studio" page with a dark blue header and a teal navigation bar. The main content area features a search bar and a filter dropdown. Below is a grid of product cards. The first card, "IAmhere", shows a construction scene with a hard hat and blueprint, priced at 12090.00. The second card, "Wedding Cards", shows a blue feather icon, priced at 345.00. The third card, "Business Cards", shows several business cards, including one for "PAMPEZ", priced at 12.00. Each card has a "View Details" button.

## 3 Section 14: Customize Your Order Page

💡 Lets users customize selected templates by changing fonts, sizes, paper types, colors, and more before placing an order.

Customize Your Order X

## 💻 Section 15: Shopping Cart Page

💻 Displays selected items, quantities, prices, and allows users to **edit or remove** items before confirming the order.

The screenshot shows a shopping cart interface. At the top, there's a navigation bar with 'Home' and 'Cart'. Below it, the title 'Shopping Cart (1 item(s) in your cart)' is displayed. A table lists one item: Product ID 9, Selected Customizations 3, Quantity 9, Price \$12.00, and Total \$108.00. A red 'Remove' button is next to the total. Below the table, a teal bar shows the 'Order total : \$108.00'. At the bottom right is a 'Confirm Order' button.

## ⌚ Section 16: Confirm Order Page

✓ Final step where users **enter shipping details**, **confirm their order**, and receive a summary of charges.

### Confirm Your Order

**Total Amount:** \$108.00

**Delivery Address**

I agree to the [terms and conditions](#).

**Cancel**

**Submit**

## ★ Section 17: Customer Reviews Page

- Displays feedback and ratings left by previous customers on various products. Essential for social proof and quality assurance.

Customer Reviews

## Section 27: Designer Profile Page

 Designers can manage their uploads, bookings, and review statistics from this personal dashboard.

The screenshot shows a 'About Me' section with the following details:

- Home > About me > 1
- About Me**
- Hey I am here to work for you
- Name:** Muhammad Taha Khan
- E-mail:** tahakhan202004@gmail.com
- Education:** 1
- Phone:** 03278907887
- Portfolio**
- Status:** True
- Skills:** Graphic Designer

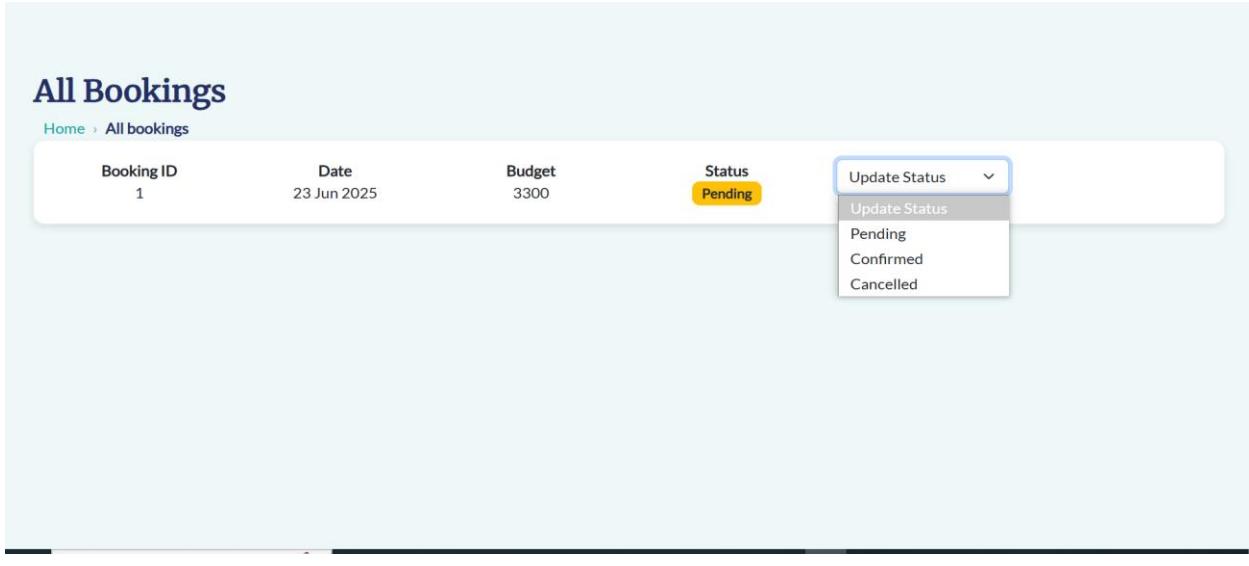

On the right, there is a circular profile picture of a person in a blue shirt working on a sink.

Below the profile are four performance metrics:

- 12 Happy Clients**
- 12 Project Completed**
- 13 Positive Reviews**
- 14 Client Satisfaction**

## Section 28: Designer Bookings Page

 Designers can view their assigned bookings and upcoming design commitments.

The screenshot shows a table titled 'All Bookings' with one entry:

Booking ID	Date	Budget	Status
1	23 Jun 2025	3300	Pending

To the right of the table is a 'Update Status' dropdown menu with the following options:

- Update Status (selected)
- Pending
- Confirmed
- Cancelled

## ⌚ Section 29: Our Graphic Designers Page – Meet the Creators

🎨 The **Graphic Designers** page showcases a curated list of professional designers who contribute custom templates and artwork to the platform. Each designer profile includes their name, portfolio previews, and booking/contact options.

💼 Users can view designer-specific galleries and choose to collaborate for personalized orders or events. This builds **trust and transparency**, empowering customers to connect directly with creative minds behind the prints.

### Our Graphic Designers

Home > Designers

Join As a Designer

The screenshot displays a grid of four designer profiles, each featuring a circular profile picture and the designer's name. Below each name are three buttons: 'Available for Work' (blue), 'View Profile' (green), and 'Book Now' (teal). The profiles are arranged in two rows of two.

Designer	Status	Action	Action
Muhammad Taha Khan	Available for Work	View Profile	Book Now
Muhammad Taha Khan	Available for Work	View Profile	Book Now
Faheem Umer	Available for Work	View Profile	Book Now
Faheem Umer	Available for Work	View Profile	Book Now

## 🔗 GitHub Repository

Browse the complete source code of the **Prints Studio** project here:

<https://github.com/pupucit/blazor-project-taha>

This repository includes all Blazor components, backend services, and database logic used to build the application. It showcases the implementation of product customization, admin controls, and clean architecture in a real-world .NET project.
